

GEZE – standards for long property packaging

Dear Sir or Madame,

the following standards for packaging of long property materials must strictly be adhered to due to changes in logistic processes at GEZE. Long property materials are considered with a length over 3,50 m.

In order to realise a continuous optimal storage, GEZE will not accept and store any material that differs from these standards. These materials will lead to return consignments (refusal of acceptance).

Maximum **outside measurements**

- 450 x 450 mm (including filling wood)

The following **packaging material** is given

- Cardboard box all around and on the front side
- Edge protection at all 4 edges (above and below)
- Paper interlayer for profile protection
- Filling wood (min. 90 mm height due to forklift truck)
- Plastic or steel strap

Marking on both facing sides

- GEZE supplier number
- GEZE identity number
- Product designation
- Filling amount (number of items)
- Cardboard weight (max. 1 t, higher weights after consulting)

These packaging standards are valid for all long material deliveries except for specified or differing agreements of packaging (small bunch, delivery in bins, etc.). In such cases the conditions agreed upon are valid as specified on the GEZE orders.

For further information please contact GEZE logistics: logistics.de@geze.com. Thank you for your understanding. We look forward to a continuous pleasant cooperation.

Yours faithfully
GEZE GmbH
