

TRADE FAIR PREVIEW REPORT FOR PUBLICATION

Leonberg, 09.08.2018

GEZE at Security | 25 - 28 September 2018
Messe Essen, Hall 3, Booth 3A78

Signet: GEZE GmbH

Networked Safety. Made by GEZE.

How do you make a building safer, more comfortable, efficient, cost-effective and sustainable? With the new innovative GEZE system for building automation: GEZE Cockpit is the first smart door, window and safety system. Visitors are sure to be excited by the additional benefit of the wireless extension kit for hold-open systems on fire protection doors. It's already a winner! Also on show will be the very many advantages of the 'invisible' controller of the self-locking panic locks for swing doors.

Increased safety through smart networking: the GEZE Cockpit building automation system

Photos: GEZE GmbH

Buildings become safer when products from different product groups communicate optimally within the building. GEZE Cockpit is the first smart door, window and safety system. The solution can be used for smart networking of automated GEZE products, as well as for central visualisation, monitoring, and operation. GEZE Cockpit for the first time enables the full intelligence of GEZE products – including all available control options and status information – to be integrated into the building automation system: for completely new options in Smart Buildings. GEZE Cockpit can be operated as an independent system, or integrated into a higher-ranking building control system. <http://www.cockpit.geze.com/>

Expanding GEZE hold-open systems wirelessly: the FA GC 170 wireless extension

Photos: Jürgen Pollak GEZE GmbH, Signet: GEZE GmbH

The improved hold-open systems range is now safer and more comfortable thanks to a special extension solution for fire protection doors. The GEZE FA GC 170 wireless extension replaces cable connections with wireless solutions. The wireless extension components can be easily connected to existing systems via a wireless module, making FA GC 170 easy to retrofit. New and award-winning: the GEZE wireless extension kit won the award for Innovative Architecture at the ICONIC AWARDS 2018.

ABOUT GEZE

The GEZE brand stands for innovation and premium quality products, processes and services. GEZE is one of the leaders on the market and is a reliable partner worldwide for door, window and safety technology products and systems. No matter what the requirements of the building are – GEZE realises optimum solutions and combines functionality and security with comfort and design. GEZE door closers open up numerous technical and visual options. Every day millions of people go through doors equipped with the overhead door closers from the TS 5000 series and enjoy the barrier-free convenience of automatic door systems, e.g. the Slimdrive and Powerturn lines. The integrated all-glass design systems are pure aesthetics. GEZE also has a wide product range for window and ventilation technology. Complete "intelligent" smoke and heat exhaust solutions (RWA) and a comprehensive selection of door systems for RWA air supply solutions are also available for preventative fire protection. GEZE's safety technology includes escape and rescue route solutions, lock technology and access control systems. With system expertise, GEZE creates coordinated system solutions that combine individual functions and security requirements in one intelligent system. The latest innovations are the new building automation system GEZE Cockpit and interface modules for integrating GEZE products into networking solutions which turn buildings into Smart Buildings. GEZE product solutions have received numerous awards and can be found in renowned structures all over the world. The company is represented by 31 subsidiaries, 27 of which are abroad, a flexible and highly efficient distribution and service network and more than 3,000 employees worldwide and generated revenues of over 406 million Euros in the 2016/2017 business year. www.geze.com
